Software engineer at pharmIT.

Projects

TextUtils

Textutils is a utility that will help you to manipulate your text the way you want to.

Chat-Box

It is a type of messanger where you can create your chat group and chat with your buddies. It also allow you to choose your own avatar.

Under progress: PGLife

In the mentioned project I'm developing a working web application where you can search for the PG's that fits into your budget and fills your requirements. This web application will be created using reactjs with the help of Internshalla mentors.

Weather update

This web application helps you to get your city weather updates.
